Subject: OR CZARA Forestry Rds/Pesticides Rationales and RTC
Attachments: Forestry-Rds, Pesticides & Ag.doc; RTC Forestry Rds & Pesticides.doc

Hi Jeff/Rob--

I wanted to share with you the remaining draft rationales for the Forestry-roads and Forestry-pesticide sections as well as our Response to Comments for those issues as well. I've highlighted a few specific mentions of NMFS in yellow although most are related to the pesticides sections.

I know you aren't the pesticide experts and I plan to share the pesticides rationale with Scott Hetch and Thomas Hooper as well who've I've been working with to better understand the BiOps and the WA Toxics lawsuit, etc. but thought I would send along as well in case you're interested.

As you know, we won't be using Ag as a basis for our decision in January but plan to follow up with the state soon after with a more specific feedback on their ag efforts. The language we propose to include related to Ag in the Jan decision doc is similar to what was included in the Dec. proposed decision (see Ag lang. beginning on pg. 10)

If you have a chance to look over the docs, any feedback/comments you have by Nov. 6th would be much appreciated. The entire decision doc and response to comments (which includes the rationales and RTC related to forestry-riparian and landslides which you have already reviewed) are currently undergoing Mngt/Legal review so language may change somewhat based on their feedback. I'll keep you posted as things are finalized.

I will also begin drafting a rollout plan/key messages doc for the Jan. decision and will be sure to coordinate with NMFS as well.

Allison
